## State-of-the-Art Roses

For over 70 years, Certified™ has been committed to delivering exceptional, state-of-the-art roses through our extensive network of global breeders. Our roses represent genetics from the world's leading breeders such as Delbard Roses (France), Tantau Roses (Germany), Harkness Roses (United Kingdom), and Orard Roses (France). The company's R&D program is led by Tom Carruth, botanical curator and award-winning hybridizer. Through Tom's leadership, Certified™ continues to bring extraordinary new varieties to market that are breathtaking, vigorous and disease resistant.

*Orard Roses*

## Roseraies Orard

Les Roseraies Orard was created in 1930, in Feyzin, France (south of Lyon) by Pierre-Joseph Orard. With favorable agro-climatic conditions (deep soils, harsh climate), Pierre-Joseph quickly ramped up production and enthusiastically launched into varietal creation. His son, Joseph Orard, took over the production activity in the 1950s.

Since then, Jean-Charles and Pierre Orard, grandsons of the founder, have taken up the torch and are continuing the family tradition. Indeed, they have produced exceptional garden roses while strengthening the company's breeding and varietal programs. Today, Roseraies Orard is managed by Joseph Orard's sons Pierre and Jean Charles, as well as Jean-Charles' wife Laurence Orard.

*Rose Field in Uetersen, Germany and Hague Rose Trials in the Netherlands*

## Tantau Roses

For over 100 years, Tantau Roses has been dedicated to breeding garden and cut roses and has established itself as a worldwide leader in hybridizing award-winning varieties. Located in Uetersen, Germany, all Tantau varieties are carefully selected and tested in different regions to ensure exceptional performance. In 2020, Certified™ introduced two outstanding Tantau Hybrid Tea roses to the U.S. market: Forever Yours™ and Scentuous™.

## Delbard Roses

Delbard Nursery was founded by and named after George Delbard, who was breeding fruit trees more than eighty years ago at his family farm in the Malicorne, Allier region of central France. Later on, he added roses, dahlias, and other flowers to his breeding program. His grandson, Arnaud Delbard has expanded the business and works closely with the Institute National de la Recherche Agronomique (a French governmental organization) as well as other international programs for global selective breeding.

# KORDES® ROSES

The W. Kordes' Sohne breeding program is one of the largest in the world. Before introducing a new rose, Kordes® carefully evaluates it for such qualities as color, size, form, vase life, productivity, disease resistance, and fragrance.

Every year, using traditional hybridizing methods, the Kordes® staff creates approximately 1,200,000 new seeds from making crosses. The resulting seeds are harvested and planted for the initial evaluations and selection.

Thousands of these are selected for further evaluation and field trials. These trials last more than 7 years, with only a handful of roses being selected for release each year to the public.
